

Unite! “Digital Campus” Community

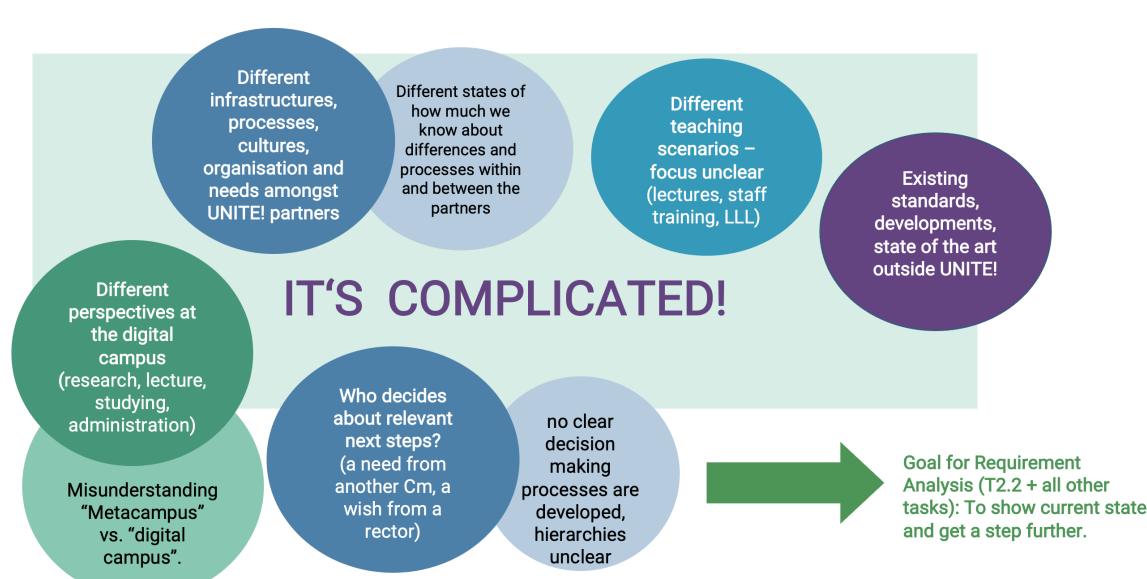

How Cm.2 maintains and develops IT infrastructure for learning and teaching for the Unite! alliance

The Unite! Community “Digital Campus”

... “should aim to establish a digital infrastructure that enables Unite! students to have a seamless journey through digital learning and teaching offers of the alliance and its partners.”
(Ebner et al., 2023, p. 8)

How it started in Erasmus+ in 2022

Source: Figure1 in Ebner et al. (2024)

The Unite! IT infrastructure for learning and teaching

... is addressing learning management issues, European Student Card, integration of services such as eduGAIN, course metadata, and more.
... is described in detail in Ebner et al. (2024).

Ebner et al. (2024). Aligning IT infrastructures for digital learning amongst the European university alliance Unite! - The Unite! digital campus framework and requirements (1.0). Unite! Community 2 Digital Campus, Graz University of Technology. <https://doi.org/10.3217/36yen-0wy21>

The Unite! Metacampus

... <https://metacampus.unite-university.eu/>
... is Unite!'s learning platform with easy access for all members of the Unite! universities.
... technically, it is a federated learning management system based on Moodle with no need for registration because we use eduGAIN.

How Cm.2 is organised

- Monthly Cm.2 meetings for all. Tasks and working groups meet according to their needs.
- A Technical Commission was established to deal with any formal needs and decisions relating to the technical infrastructure that are not highly strategic.
- Well-working support for Metacampus support issues.
