

Canvas for the creation of an open educational resource (OER)

I AM PLANNING

Slides Worksheet Quiz Video

FOR THE TARGET GROUP

Prior knowledge Setting Knowledge

TO REACH THE (LEARNING) GOALS

Application Reflection

Our learning video canvas helps you to create an educational video.

SKETCHES AND NOTES

COMPONENTS

search.creativecommons.org
OER search: oercommons.org
openeducation.at/suchen/

What is needed?	pre-existing?	comment, e.g. attribution and license of others' materials
Audio	<input type="radio"/>	
	<input type="radio"/>	
	<input type="radio"/>	
	<input type="radio"/>	
	<input type="radio"/>	
Texts	<input type="radio"/>	

LICENSE AND ATTRIBUTION

e.g. CC BY 4.0 International + name + institution or university

DONE - THOUGHT OF EVERYTHING?

- The resource uses an open format (e.g. html, h5p, pdf).
- CC license (e.g. CC BY), version identifier (e.g. 4.0 International) and attribution are included in the resource.
- The license text is linked with an URL.
- The OER is described appropriately (meta data).
- Others' materials have compatible licenses.
- Other materials are credited according to their license - see TASL rule of thumb (wiki.creativecommons.org/wiki/Best_practices_for_attribution)
- Changes to existing materials are explained.
- The OER is published (in a repository, on Zenodo, on your own website).
- Colleagues know about the new OER (short e-mail, face-to-face conversation)
- It is planned to reuse the OER or its components (in other courses or future semesters).

OER in a learning management system is not automatically published and usable for others!
